COMPANY PROFILE

INTRODUCTION

Power Team is a world leader in hydraulic special service tools and equipment for motor vehicle and industrial markets. We manufacture precision quality high-pressure hydraulic products which include pumps, cylinders, valves, clamping components, related hydraulic accessories, and special tools and equipment. Products are marketed under the Power Team and Hytec brand names and sold through a worldwide network of stocking industrial distributors. Service is available throughout the world at authorized Power Team Hydraulic Service Centers.

These precision quality products are used wherever strong, concentrated force is required. The markets for our products include manufacturing, construction, motor vehicle, mining, utilities, shipyards, rescue operations and many more.

HISTORY

Power Team began as a part of the Owatonna Tool Company also known as OTC, which was founded in 1925 on the strength of a patented mechanical gear puller.

By the 1950's, as the applications for these pullers grew in size, customers needed more than just manual power to operate them, so we started making pullers with hydraulic power. This was the start of the Power Team product line.

Over time we expanded our line of standard hydraulic products and sold them through a network of automotive and industrial distributors. In addition, we've developed special hydraulic products for a number of original equipment manufacturers who incorporate our product into theirs. We also developed a line of precision hydraulic workholding products sold under the brand name of Hytec.

In 1985 the [SPX Corporation](#) acquired OTC. Based on solid growth Power Team became a separate operating unit of SPX in 1988.

Power Team grew fast enough and big enough to need a new facility in 1989. It was then that we built and moved into our state-of-the-art manufacturing facility in Owatonna, Minnesota.

PRODUCT SUMMARY

Cylinders / Rams

- 10,000 PSI Operating Pressure
- Capacity from 5 to 565 tons
- Steel and Aluminum Models Available

Hydraulic Pumps

- 10,000 PSI Operating Pressure
- Models available: Hand/Foot, Air, Battery, Electric and Gas pumps

Multi-Lift System

- Controls up to 16 Lifting Points simultaneously

Pullers

- Grip-O-Matic and Super Grip-O-Matic Models
- Mechanical - Capacities from 1 to 37 tons
- Hydraulic - Capacities from 5.5 to 11 tons

Jacks

- Bottle Jacks - Capacities from 2 to 50 tons
- Inflatable Jacks - Capacities from 12 to 73 tons
- Toe-Lift Jacks - Capacities from 5.5 to 11 tons
- Track Jacks - Capacity 11 tons

Hydraulic Tools

- Punches- Capacities from 20 to 35 tons
- Nut Splitters - Capacities from 15 to 25 tons
- Spreaders - Capacities from 1 to 1.5 tons
- Flange Spreaders - Capacities from 5 to 10 tons
- Maintenance Sets - Hand Pump or Electric Pump Versions

Equipment

- "C" Frame, "H" Frame and Roll-Bed Press Models -
- Capacities from 10 to 200 tons
- Floor Cranes - Capacities of 2200, 4400 & 6600 lbs
- Load Positioning Slings - Capacities of 2000, 4000 & 6000 lbs
